The LA Promise Fund is a nonprofit organization with a mission to prepare students for success in college, career, and life. We believe that a strong education system that effectively serves all students is the key to a thriving community. Our vision is to radically improve the future of LA communities by increasing educational equity and ultimately closing the opportunity gap.

To achieve our mission, the LA Promise Fund develops and implements high impact educational programs and services that connect students and families to the resources they need to succeed, reaching young people inside their classrooms and through a rich array of expanded learning opportunities and building their families’ capacity to support them in realizing their potential.

We employ a variety of strategies to impact educational outcomes for students, including managing charter schools, partnering with Los Angeles School District schools and running countywide programs.

Our Programs

**GoForCollege**
Creating a school-wide culture where college prep is the norm and every student has access to higher education

**PromiseParent**
Building capacity of parents and caregivers to support their children’s educational and career pursuits by engaging them around their roles, rights, and responsibilities

**SouthLA NSI**
Transforming outcomes for African American, Latinx, and low income students by working with twelve school-based teams to increase the number of students taking and passing the required college preparatory (A-G) coursework.

**TheInternProject**
Enhancing career readiness by placing Los Angeles public high school juniors and seniors in paid summer internships in an array of fields

**GirlsBuild**
Creating the next generation of change agents by challenging young women from public middle and high schools across LA County and beyond to use STEM principles and 21st Century learning skills to tackle issues

**ArtsMatter**
Partnering with top artists and creators to develop high-impact arts education programming for Los Angeles County public schools

**Health & Wellness**
Providing information, services, and healthy opportunities to students and families in our network of schools

**SevenToSeven**
Providing enriching out-of-school time experiences including tutoring, sports, robotics, arts and more

---

**How We Work**

The LA Promise Fund is a nonprofit organization with a mission to prepare students for success in college, career, and life. We believe that a strong education system that effectively serves all students is the key to a thriving community. Our vision is to radically improve the future of LA communities by increasing educational equity and ultimately closing the opportunity gap.

To achieve our mission, the LA Promise Fund develops and implements high impact educational programs and services that connect students and families to the resources they need to succeed, reaching young people inside their classrooms and through a rich array of expanded learning opportunities and building their families’ capacity to support them in realizing their potential.

We employ a variety of strategies to impact educational outcomes for students, including managing charter schools, partnering with Los Angeles School District schools and running countywide programs.

• LA Promise Charter Middle School #1
• LA Promise Charter High School #1
• John Muir Middle School
• Manual Arts High School
• West Adams Preparatory High School
We know that education and opportunity are key to our young people’s success, and our strength in realizing that vision is the partnerships we forge with fellow organizations, community leaders, schools, and families.

The heart of what we do at the LA Promise Fund is focused on South LA. We have worked in this community for over 25 years. We are committed to the families that live here, the teachers who teach here, and the students who learn here. Our work is to bring resources to this community so that its potential can be realized. It is our promise to South LA.

In 2018-19, we deepened our work in South LA, securing new funding to bring additional programs and supports to the community in which we maintain our largest footprint. We were also able to expand our work beyond South LA, using the knowledge and experience we have developed in South LA to support students throughout LA County and beyond.

We are proud to serve as leaders of this organization and want to extend our thanks to all those that play a role in moving the LA Promise Fund forward — our donors, sponsors, partners, families, students, teachers, administrators, and staff.

---

Malala Yousafzai

“There are many problems, but I think there is a solution to all these problems; it’s just one, and it’s education.”

Megan Chernin
Co-Chair, Board of Directors
LA Promise Fund

Stephen Prough
Co-Chair, Board of Directors
LA Promise Fund
This past year, we brought in additional resources to support students and families in South LA, home to our network of partner and charter schools, as well as continuing our commitment to LA County and beyond by implementing bold, innovative initiatives.

In 2018-19, we increased the number of students served at our charter schools, secured state and federal funding to support expanded ArtsMatter programming and to implement a Career Pathway Connections initiative, and were awarded a Gates Foundation Networks for Improvement grant to identify and solve common problems our middle and high schools are experiencing by using evidence-based interventions. These three grants focus on students at a network of schools in South LA. We also launched our girls empowerment program in 10 cities across the country and began planning for the launch of an interactive, career-focused STEM experience for thousands of LA County students.

Thank you to all of our partners and supporters, who share our vision for educational equity and our commitment to realizing positive outcomes for all young people. We look forward to continuing to work together to further our collective efforts.

Veronica Melvin
President and CEO
LA Promise Fund
New Grants

In 2018-19, the LA Promise Fund secured several large grants that will impact thousands of students’ college and career readiness, deepening our work in South LA and expanding our reach across LA County.

**Amgen Biotech Experience (ABE)** - ABE is an innovative, hands-on science education program that encourages high school students to explore biology and biotechnology through the lens of scientists. ABE provides teachers with curriculum, training, and state-of-the-art lab equipment that allows students to learn core scientific concepts utilizing the same techniques used by biotechnology researchers. The result is an immersive, inspiring learning experience that links classroom learning to real-world application.

**Career Pathway Connections (CPC)** - Funded by the California Community Colleges Strong Workforce Program, CPC strengthens the connection between a network of 10 South Los Angeles area high schools, Trade Tech, and the business sector to ensure that more local students are exposed to and prepared to pursue post-secondary education and careers in the fields of Digital Media, Healthcare, Business & Finance, and Construction, with the mission to revitalize South LA.

**Media ArtsMatter (MAM)** - MAM is designed to transform the classroom experiences of underserved South LA students by focusing on the integration of media arts in English Language Arts and Math classrooms. The program is funded through a U.S. Department of Education Assistance for Arts Education Development and Dissemination grant.

**South LA Network for School Improvement (NSI)** - Funded by the Gates Foundation, South LA NSI is a partnership of 12 schools located in South Los Angeles, that is increasing the number of African American, Latinx and low income students prepared for college. This initiative takes a network approach: Groups of schools work together to identify key common problems of practice and solve problems with local context for authentic change using continuous improvement process and analyses to achieve collective impact for South Los Angeles.
Go for College exposes students at our partner and charter schools to an array of colleges and universities. From college trips for every 9th grader, to college counselor training for teachers to dual enrollment classes with middle and high school students taking community college classes, Go for College ensures that every student is aware of post-secondary options and has the supports needed to fulfill their college dreams.

Joseph graduated from Manual Arts in 2019 and was accepted at Wesleyan University, his first choice college. He was one of 1500 students navigating academics, social life, and extracurriculars every day, but his story was a little different. Joseph was born in Nigeria and moved with his twin brother to the U.S. to live with his father at age 14. After enrolling at Manual Arts, Joseph took advantage of every opportunity he could find. But it wasn’t always easy. He had to leave behind his mom, who persuaded him to move to the U.S. to take advantage of opportunities not available back in Nigeria. It was hard to find his niche and make friends in a new country.

Go for College was a driving force in changing Joseph’s life for the better. He explains, “I met other kids who wanted to be better, who wanted to be a vital force for their communities, like I did. And I met Robin [Kurtzman, LA Promise Fund board member and school-site volunteer]. The words and advice I got from her really helped me. I am trying the best I can to make the best out of myself, to help my mom, to be a medium to help out the people who didn’t have this opportunity.”

Joseph has a strong vision for his future: “I want to...be a medical doctor. I’ve always loved science. I want to be on the pre-med track, but minor in music, photography, theater, and film. I love creating stuff... My dream is— at the end of the road, if everything has been well, if I’ve been successful— I hope to bring my mom here, give her the best life she could ever ask for, the life that she deserves.”

The LA Promise Fund is proud to have played a role in shaping Joseph’s future. We will continue to follow his journey and are excited to see what is in store after Wesleyan!

"My parents have always said, since I was a little kid, ‘Oh, go to college, go to college,’ and they always told me, ‘Ask for help when you need it.’ If it wasn’t for them, I feel like I wouldn’t be who I am.”

Rene Calzadilla, West Adams Preparatory High School graduate, UCLA freshman
The LA Promise Fund believes that parents, guardians, caretakers, and families are key partners in achieving a student's success. Promise Parent empowers parents with essential resources and workshops so that they can better advocate for their students' education.

We know the power of parent engagement; it shapes and supports who we become. The Promise Parent team at the LA Promise Fund works closely with our South LA community parents and caregivers. The team's goal is to support parents in helping their students understand the value of education, persist in finding and excelling in a career of choice, and become valuable members of society by giving back and spreading their knowledge for generations to come.

The Promise Parent College team consists mainly of South Los Angeles natives. They are a group who personally understand the richness of South LA, a group that is uniquely qualified to work with the community, students, and families because they have become a model example of what our students can one day be.

Sarah Escajeda, Associate Director of Parent Engagement, LAPF

“Like I always say, these children are also my children — each and every one of them — because they are my future doctors, lawyers, contractors etc. from South LA. I hope that one day they choose to come back and support their community in a similar way as I am so proud to be of service to my community as part of Promise Parent.”

Wendy Ayuso
Parent engagement coordinator, LAPF; Manual Arts grad
I hope that both students and parents learn to BELIEVE. To believe that we can ACHIEVE. That in the process they learn to allow themselves to seek help when needed, be coachable and work hard.

“Understanding that I have the RIGHT and the POWER to advocate for high quality education for my child has been the greatest asset I have learned through my years of work. I have utilized each phase of my life as both a student and a mom as a way to learn and teach others the stages of that occurring both academically and developmentally. I am now a proud mother of a first-generation college student currently attending Bentley University.”

Monica Cardona
Director of Family and Community Engagement, LAPF; Mom; Manual Arts grad
The Intern Project (TIP) advances students’ career readiness by placing Los Angeles County public high school juniors and seniors in dynamic paid internships in high-growth fields such as digital media, entertainment, technology, health care, and design. The program targets students of color and low-income students, giving them experiences that can level the playing field. The school year program focuses exclusively on South LA, including our partner schools and our charter high school, while the summer program is available countywide.

Joselyn Luna, 12th grade, West Adams HS
College: Smith College | Major: Education

"With a mentor, you get a parent-like figure and a close friend. I don’t know what I’d do without my mentor, Dana Belcastro. She’s helped me with my self-esteem and confidence. In addition, college is expensive, and my parents just don’t have the funds that can afford it. Scholarships are the only way I’ll be able to get through. With the Fox scholarship, I’m already getting ahead."

Steven Pham was one of the first students to participate in TIP. He was placed at Fullscreen, and is still remembered fondly by the staff there. Steven recently graduated from USC and began working for Ernst and Young as a tech consultant. Stephen learned about TIP through his high school teacher Leslie Aaronson, who now serves as LAPF’s Director of Career Pathway Connections. Leslie connected Stephen to LAPF Board Chair Megan Chernin at a mock career fair that she hosted. Stephen felt a connection to Megan and applied to TIP after learning about the program from her.

Stephen was placed at his first-choice site, Fullscreen, which appealed to him because he was extremely interested in YouTube. He found it “kind of intimidating” to be immersed in the industry with adults as a high school student, but quickly found that the Fullscreen team was friendly and willing to help. He noted that, “I learned so much. Being able to absorb and take in what everyone was saying was very valuable to me. Getting that paycheck and getting that experience – that was one of the more valuable experiences of my high school career.”

TIP had a profound impact on Stephen’s career path. Back in high school, he was considering a medical career, but after interning at Fullscreen he decided to incorporate more of the business side, as well as data-driven work, into his career. He majored in industrial engineering at USC. Each week at Fullscreen the interns shadowed different departments. The business and editing department, the technical side of the company, really resonated with him, and so he tried to center his college curriculum around that. Stephen keeps in touch with his Fullscreen mentor, Daniel Breitberg, who is always there for him if he needs anything.
Girls Build challenges young women from public middle and high schools to use STEM principles and 21st Century learning skills to effect social change. Girls Build activates young women to engage with the issues they care about, and prepares them to solve the problems of tomorrow. This year, the teams tackled issues including the needs of the homeless, improved safety through street lighting, feminine hygiene, and self-care.

| Community members served by Girls Build projects | 30,000 |
| Schools Participated | 200+ |
| Los Angeles County teams, 10 national teams | 43 |
| Participants qualify for free and reduced lunch | 85% |
| Participants are girls of color | 95% |
| Community members registered/pre-registered to vote | 30,000 |

The Girls Build Summit

Ten thousand girls attended our 2018 Girls Build Leadership Summit, held at the LA Convention Center on October 15th, with thousands more watching remotely as the event was streamed on Facebook Live. The girls were moved by keynote speaker Shonda Rhimes, who called on them to use their voices and votes to make change in their own lives and communities. Delaney Tarr and Kyrah Simon, survivors of the school shooting at Marjory Stoneman Douglas High School, encouraged their student peers to become activists in an invigorating panel discussion with California Secretary of State Alex Padilla. Thanks to our partners When We All Vote and California Secretary of State Alex Padilla’s office, we registered over 600 girls in a single day, making the Girls Build Summit the largest voter registration event in the nation.

"Since the beginning of our project, I have individually grown as a communicator. As for the group, we have grown, too. We’re learning how to raise our voices, make an action plan, and execute on it."

Kayce, Bronx Bright Girls Build Team Member
Spotlight: Bronx Bright Team

In 2018-19, Girls Build branched out beyond LA County, with ten teams from across the country participating. The Bronx Bright team from the Bronx, New York took on the issue of lighting in their community. The powerhouse team of five — Jasmine, Kayce, Monse, Natalia, and Rayanne — were committed to making it safer and more comfortable for community members to walk and spend time outdoors at night. Using STEM principles and other skills to document the current light levels through video, light measurements, and interviews, the team developed an action plan for improvement focused on a local park.

The young women displayed tremendous initiative, presenting at a lighting design company’s board meeting to seek insight and a financial investment, applying for grant funding, and building relationships with key collaborators who could help move their ideas forward. The true culmination, however, was when they were able to get the additional lighting installed in the park. They celebrated this accomplishment with a community-wide, evening event in the well-lit park.

“I personally grew up “accepting” the poor lighting in my neighborhood because I did not know that other options were available. I grew up speed-walking with my mother to get home and grew accustomed to the lifestyle. Yet, as I grew older and explored outside of the Bronx more, I noticed myself not having to worry about lighting in spaces such as downtown Manhattan. So, when this project was proposed, it was easy to make the choice of wanting to allow our neighbors the same experience of relief when walking home because they can see what is in their surroundings.”

Monse, Bronx Bright Girls Build Team Member
Collaborating with dozens of community partners and LAUSD’s Beyond the Bell program, the LA Promise Fund expands and deepens the menu of activities and programs available for our students through our 7 to 7 enrichment program. Ranging from tutoring, sports, civic activity and advocacy, fine arts, robotics and more, 7 to 7 continues to engage students in meaningful activities throughout an extended engaging and holistic day.

When volleyball coach Jennifer was in elementary school, she had a coach — also named Jennifer — who created a safe place after school where Jennifer felt more comfortable than she did at home. That experience made her want to work with kids, especially girls having trouble at home or at school. She wanted to motivate them as her Coach Jennifer had done for her. Jennifer went on to play volleyball in high school. She was team captain for three years and gained confidence and believe that she could “do great things.” Currently a student at LA Trade Tech, Jennifer learned about the volleyball coach position from a flyer there and landed her dream job, inspiring the next generation and contributing to their healthy development.

“Being here coaching is amazing. It’s something I’ve wanted to do since 6th grade because of Coach Jennifer. I loved her and wanted to share the love with other girls.”
Our schools offer a college-going culture, rigorous standards-based instruction, engaging lessons through project-based learning, focus on technology, robust wraparound services, and a variety of enrichment opportunities. LA Promise Charter Middle School #1 provides arts-based programming and essential hands-on digital learning tools. LA Promise Charter High School #1 is a digital media and film-themed academy that ensures its students are college and career ready with dual college enrollment at Los Angeles Trade Tech College.

This year, our schools focused more intensively on social and emotional learning, recognizing that our students often face challenges outside the classroom that impede their academic progress. By focusing on the whole child, the students that we serve will have the foundation needed to transition successfully to adulthood.

Sometimes students require more attention than their teachers are able to provide. That is why, after five years of teaching math at a charter school, I transitioned from the classroom into counseling. I know that if we can help these kids persevere through life’s challenges now, then they will be more successful in college and in their life after school.”

Santiago Gonzalez
Social Emotional Learning Coordinator
At LA Promise Charter Middle School, we’re seeing gains above comparative schools* in key areas on CAASPP (California Assessment of Student Performance and Progress) test results.

**LA PROMISE CHARTER MIDDLE SCHOOL CAASPP RESULTS:**

**ENGLISH LANGUAGE ARTS (% MET OR EXCEEDED)**

- African American students outperform their counterparts at comparative schools* by 35%
- Special Education students outperform their counterparts at comparative schools* by 60%
- English Learners outperform their counterparts at comparative schools* by almost 10X

**MATH (% MET OR EXCEEDED)**

- African American students outperform their counterparts at comparative schools* by 56%
- Special Education students outperform their counterparts at comparative schools* by 66%
- English Learners outperform their counterparts at comparative schools* by more than 16X

*Barack Obama Middle School, John Muir Middle School, Horace Mann Middle School, Bret Harte Preparatory Middle School
LAUSD PARTNER SCHOOLS

This year, four out of five students at our partner high schools were accepted to college, and we saw increases in key indicators, including graduation rates and college/career preparedness. These positive results can be attributed to the diligent efforts of school administrators, teachers, and staff. This year, they focused on improving instruction by incorporating instructional strategies that support student engagement, academic discourse and discussion, and developed professional plans to build teachers’ instructional capacity. Academic content coordinators such as Math and Literacy coaches were on board to enhance teacher effectiveness.

To support our highest-need students, credit recovery was offered both during the school day and on Saturday and intervention support was offered to students at risk of failing a course. Schools also increased outside-the-classroom support staff to focus on both the academic and social and emotional needs of students and increased on-site mental health services.
STUDENTS PREPARED FOR COLLEGE/CAREER WHO MET UC/CSU GRADUATION REQUIREMENTS (A-G):

- Manual Arts: 6% Growth
- West Adams: 12% Growth

OUR SUPPORTERS

Young Professionals Council

To expand our reach to new audiences and broaden our network of supporters, the LA Promise Fund launched our Young Professionals Council (YPC) in February 2019. YPC members come from a variety of different career backgrounds and industries, but are united by their belief in the mission and programming of the LA Promise Fund and their commitment to generating resources and opportunities for traditionally underserved youth in LA County. We are excited to see how these dedicated young professionals will help further the LA Promise Fund’s mission in coming years.

I completed my PhD in international women’s rights and writing in 2017 and have remained passionate about equality, diversity, and education issues even though I no longer work in academia. When I moved to Los Angeles last year, I was looking for volunteer opportunities that would allow me to make a positive difference in my community. As a YPC member, I work with a dynamic, inspiring group of individuals who push me to think creatively about how we can promote educational equity for youth in LA County. This group, and LAPF’s important work, have opened my eyes to the realities that under-represented and minority communities in America face in achieving the opportunities that I was given so freely. I want to build a career that will touch people’s lives in a meaningful way, and being a member of the LA Promise Fund’s Young Professional Council is a wonderful way to make that happen.”
