Mission Statement
To improve academic achievement as well as college and career access and success for students in the Westbrook Academy, South Los Angeles Transit Empowerment Zone (SLATE-Z), and beyond

Vision Statement
Students are successful in college, career and life by reducing education inequities and opportunity gaps.

Our Values

Integrity - We are honest and guided by strong moral principles

Accountability - We are responsible to all stakeholders for all we do

Collaboration - We actively work together to reach our goals and outcomes

Professionalism - We are committed, respectful, responsive, and reliable with each other in all we do

Excellence - We have high expectations and are outstanding in all we do

Diversity - We celebrate the uniqueness and differences of all with whom we work and serve

Equity - We are just, unbiased, and inclusive of all with whom we work and serve

How We Work

At the LA Promise Fund, we believe that education remains one of the most powerful tools to break century-old cycles of oppression, violence and poverty for students, their families and communities. We believe education can chisel away at racism by teaching diverse histories and perspectives and by disrupting a predominately white male perspective that has excluded and actively erased the voices and contributions of people of color. Institutionalized racism and systemic injustice pervades many aspects of society today, especially for our African American students and families. We are committed to eradicating racism within education, raising our voice against racism and uplifting our South LA community and beyond.

Our charter schools, programs and wraparound services strive to bridge the divide that leaves too many students of color unprepared for life beyond high school – whether that be a four-year college, a trade, military service or a career. We connect students and families to the resources they need to succeed. We reach young people inside their classrooms and through a rich array of expanded learning opportunities and we build their families’ capacity to support them in realizing their potential. We focus on academic achievement, high school graduation and college readiness.

Through research-based programs, LA Promise Fund takes a holistic approach toward the development of critical thinking and practical life skills for students as well as college and career preparedness. Students experience a variety of education and work environments where they explore post-secondary options, build relationships and expand their social networks. The classroom is not only a place for solving math problems and writing essays but a place to surround students with high expectations, academic and emotional support, pragmatic guidance and a rigorous learning environment to ensure they will be successful in college, career and life.

The scope, reach and impact of our work is possible because of the support of generous donors who share LA Promise Fund’s passion for providing equitable academic outcomes for traditionally under-served Black and Brown students.
On behalf of the LA Promise Fund Board of Directors, we are proud to work with the LA Promise Fund staff to improve academic achievement as well as college and career access for students at the Westbrook Academy, in the South LA Transit Empowerment Zone (SLATE-Z) and throughout Los Angeles County. We provide traditionally underserved students of color enrichment experiences that expand their awareness of post-secondary opportunities. As well, we provide resources and training to educators and administrators who are responsible for the academic outcomes of these students. We work with families to strengthen their ability to support their students’ academic achievement and to build community.

The 2021-2022 school year saw a return to in-person teaching and learning which was yet another adjustment for staff, students and families coming out of the pandemic. We also launched a new three-year strategic plan that includes the expansion of our reach, the addition of the Black College Success program and an intensified focus on practices that research has shown improves academic achievement and college/career preparedness for the students we serve. We know that involvement in the arts and science, technology, engineering and math (STEM) enrichment programs as well as participation in dual enrollment, internships, and sports, strengthens the connection between students, their schools and communities.

We also accomplished our long-term goal of securing a permanent location for the students at Westbrook Academy, which was achieved last year through the purchase of a 4.5 acre property that straddles the South East and South LA communities. We are in the process of renovating the facility which will be ready for the 2024-2025 school year. We are confident the combination of the new home coupled with a stellar academic and enrichment program will result in improved outcomes and preparation for college, career and life for our charter school students.

It is the collective effort of our deep rooted community partnerships, our donors, staff, and families that ensures high quality teaching and learning and the delivery of wraparound services and enrichment programs for our students in South LA and beyond. We cannot do our work without you. We appreciate you and are sincerely grateful for your support of our mission.
In 2021-2022, LA Promise Fund’s commitment to diversity, equity, inclusion and anti-rascism, was strengthened by the adoption of a new mission (which speaks to an expanded service area) and a new vision statement. We also introduced organization-wide values statements that help us define supportive behaviors and launched a new three-year strategic plan with the following priorities:

1) Operate High Performing Charter Schools;
2) Provide Robust Enrichment Services; and
3) Ensure Broad Awareness, Financial Sustainability and Operational Excellence.

During the 2021–22 academic year we returned to in-person teaching and learning and although it was a rewarding year, it was still a challenging year for educators and students. Through it all, we saw successes and opportunities for improvement.

Westbrook Academy (6-12) experienced an average daily attendance rate of 89% and 91%, middle and high school, respectively but also saw chronic absenteeism rates that informed our decision to increase social emotional support for our students. Students at Westbrook middle and high schools experienced good growth on the Winter NWEA MAP Assessments and need greater improvement on the California Assessment of Student Performance and Progress proficiency rates. Eighty-nine percent of Westbrook high school graduating seniors completed the A-G coursework and the cohort graduation rate was 77%.

Westbrook Academy successfully launched a sports program.
The Parent Team trained 117 family members in health and well-being and distributed food to 130 pantry families weekly throughout the school year.
We secured a permanent home for Westbrook Academy in South Gate, CA.
We expanded our enrichment programs and wraparound services to include nine California counties servicing approximately 40,000 students which required an increase in the total organization budget from $12,300,000 to approximately $14,500,000

We recognize that these accomplishments would not be possible without partnerships with educators, funders, families and caregivers who, like our team, are committed to ensuring equitable academic outcomes for the students we serve. We appreciate your support of our mission as we continue to strive for more academic improvement and success for the students we serve.
Our Schools

Westbrook Academy delivers world class education to South Los Angeles youth grades 6 through 12 while simultaneously developing academic achievers, athletes and activists committed to social change. The Academy is a community hub that offers students a safe and personalized learning environment while engaging parents as partners in their children’s education. Westbrook Academy, which consists of a high school and middle school, are public charter schools authorized by the Los Angeles County Office of Education and are members of California Charter School Association.

Westbrook High School maintained an average 91% attendance rate

Westbrook High School cohort graduation rate: 77%
Westbrook High School seniors graduating A-G course completion: 89%
Westbrook High School seniors college acceptance rate: 81%

Westbrook High School seniors graduating A-G course completion showed growth in ELA as measured by the Winter NWEA MAP Assessment: 63%
Westbrook High School seniors graduated A-G course completion showed growth in Math as measured by the Winter NWEA MAP Assessment: 60%

Westbrook Middle School maintained an average 89% attendance

Westbrook Middle School seniors graduated A-G course completion: 51%
Westbrook Middle School students showed growth in reading lexile levels as measured by year-end level-set assessment: 55%

Westbrook Middle School students showed growth in Math as measured by the Winter NWEA MAP Assessment: 34%
Promise Parent programs provide educational, empowerment and advocacy workshop series and support services for parents/caregivers at Westbrook Academy. Promise Parent workshops help families to further understand the education school system and promote a college going and student success culture by strengthening the relationships between the school and parents/caregivers.

- Students with Disabilities: 15.1%
- Foster Homeless Youth: 0.9%

Middle School Other Demographics

- Free/Reduced Price Lunch: 58.9%
- English Language Learners: 25.0%
- Students with Disabilities: 13.0%
- Foster Homeless Youth: 3.1%
Beyond our charter schools, LA Promise Fund’s enrichment programs and wraparound services support approximately 40,000 students across nine California counties.

"LA Promise Fund initiatives provide a unique opportunity to begin shaping one’s college and career trajectory even in the most underserved and under-funded communities in the country."

Jorge Campos, Harvard University, ’22, College Center, The Intern Project, ’14-’17
“Volunteering at ABE led me to getting a summer internship at Pasadena Bio Collaborative. I worked for the ASPIRE project with Dr. Aron Kamajaya which was aimed at bio manufacturing Taq-Polymerase. The following school year I enrolled in AP Biology with confidence and my lab classes felt easier after all the hands-on experience I had. Some topics like DNA structure, gene expression, and genetics were easier to understand since I had already been introduced to some of it. I was soon asked to be a co-mentor at the ABE workshops which has given me confidence that I can guide and help my peers and juniors. I am applying to colleges now and considering majoring in computer science and minoring in biology which are now my favorite subjects.”
Rajath Manohara, Glendora High School, ‘23, ABE student, ‘18–’23

“To my understanding, the ABE program has inspired many students from more than ten countries. If all the programs are like the one I experienced, then many potential scientists have been created since the program inspires so many. In my humble opinion, the program has created an environment where students can be exposed to a new side of science that transcends what they have learned in classrooms. Being involved in the program helped me decide what I wanted to do in life besides being a music student; in fact, the program convinced me to believe that I could also follow my passion in science through hands-on interaction. Before my participation in the program, I felt like science was quite abstract and belonged to a textbook in classrooms, but after the ABE program, I now have first-hand experience to manipulate the materials and learn the daily workings of science. Science is now concrete. I hope that the program continues to get the support that it needs to continue.”
Lauren Hsu, Los Angeles High School for the Arts, ‘25, ABE student, ‘21, ‘22

The Amgen Biotech Experience (ABE) is an innovative, hands-on science education program that encourages high school students to explore biology and biotechnology through the lens of scientists. ABE provides teachers with curriculum, training, and state-of-the-art lab equipment that allows students to learn core scientific concepts utilizing the same techniques used by biotechnology researchers. The result is an immersive, inspiring learning experience that links classroom learning to real-world application. This work is funded by the Amgen Foundation and the Education Development Center.
ArtsMatter program advances the study of media arts education with the intent of building a diverse talent pipeline of Black and Brown students who are prepared to take on jobs in Los Angeles’s media and entertainment sectors. Through teacher training and the transformation of popular content from top artists and creators into standards-based instructional materials, the ArtsMatter curriculum advances media arts learning.

“Hi! I am Lucy, and I can't start to describe how grateful I am for the experiences I have been through because of the programs ArtsMatter offers. When I first got to the US, I never thought I would find a community of artists as welcoming as ArtsMatter. My first time working with them was in my advisory class. As a result, I got to work with them again during the Summer Animation Camp 2021. I got to explore something new, and I got to know more about myself as an artist. It would not be possible for me to be where I am without ArtsMatter’s help and support. ArtsMatter is like a family to me, a family that helps you develop as a person and as an artist. I will never be able to describe how grateful and happy I am with everything I have learned through this program. The work done by ArtsMatter is unique, and it is amazing to see how they manage to connect with the youth in LA through the arts. I can’t say enough about how much I cherish the help they have given me, as well as the ongoing work they do.”

Lucy Cornejo, University of Santa Cruz, ’26, ArtsMatter student, ’20–’22
Black College Success (BCS) partners with SLATE-Z+ high schools to empower Black high school students to complete a Bachelor's degree from a four-year college or university and obtain meaningful career entry. Black College Success does this by partnering with select universities and provides academic and senior planning, financial aid, and college transition and success support for students until they graduate.

“BCS is more than just a regular college support program, they're like a guardian angel. Just as I was registering for school, I found out that I wouldn’t be able to attend because I had a significant financial aid shortfall. I called the BCS team to let them know that I was going to go back home to Los Angeles because as a family we don’t have that amount of money available at the ready. But BCS wouldn’t let this be the end of my journey and my dream of attending Morehouse College. Because of their partnerships, they helped facilitate an immediate scholarship to close the financial gap. Without their help—and continued support, I would have been back on a plane to California hating every minute. But, because of BCS, I am able to stay at Morehouse and start my journey to becoming a Morehouse MAN. “

Brandon Gamble, Morehouse College ’26, BCS student ’21

“The BCS program is an amazing program that has truly changed my life. Not only did it make my first days at college easier with a scholarship but also the support it gave me from the uplifting and encouraging advisors. This is something I really appreciate especially as a black man in America where I feel like the odds are not stacked in my favor. They’ve helped me transition from being a high-school student to being enmeshed in college life in a pretty easy and seamless way. They also helped by giving me advice about which college to pick whether it’s a Cal State or a UC and additional information about other scholarships that are out there. It’s an amazing program. They are here to help you and support you throughout your entire college career. I thank them for everything they have done for me.”
Craig Mitchell-Sherman, San Francisco State University ’26, BCS student ’21

“I’ve personally been grateful for Black College Success and all the resources they’ve provided. From the laptop and scholarship that’s helped me to attend my university to the consistent mentorship and guidance, I’ve received from my academic advisor. it’s been a life-changing experience. [My academic advisor] motivated me to stay positive and work my hardest to get the results that I want to get. I’ve even told a little brother of a great friend of mine who is at Crenshaw high school this year to make sure he gets involved with Black College Success. It’s a program that he won’t regret and it’s going to be a great help for him.”
Craig Mitchell-Sherman, San Francisco State University ’26, BCS student ’21
Career Pathway Connections (CPC) creates a collaborative regional approach to align K-14 pathways for student success by strengthening career pathways across SLATE-Z, a federally designated Promise Zone and collective impact partnership with the mission to revitalize South LA. The program partners local high schools with a local community college to create comprehensive career technical education pathways that provide experience and develop skills for college and career readiness through dual enrollment and workforce learning.

The South LA Network for School Improvement is a partnership of seven schools located in South Los Angeles, committed to transforming outcomes for African American, Latinx, and low-income students. The South LA NSI works with school-based teams to increase the number of freshman students taking and passing the required college preparatory coursework (A-G) mandated by the State of California.
